

MTB Fire & Rescue Truck Camera system

FEATURES

- In cab 7" quad monitor
- Rear view camera with auto shutter
- Side view camera (cyclist camera)

FUNCTION

MTB Fire & Rescue Truck Camera Solution

This solution helps one driver perform the job with ease and safety. The in cab monitor automatically displays a perfect image from the camera or cameras configured for the task performed. When reversing the rear view camera image is shown and when turning on right hand turn signal this image is shown.

It's possible to connect up to 4 cameras and configure the system in many different ways.
