- 2 Camera Inputs & 2 Triggers (CA1 shutter camera compatible)
- 13,5 ~ 36 V

#### PIN Configuration

For connecting camera, via interface IF-MMT-2C(H) to SCANIA Radio Premium

### FUNCTION

#### MTB-IF-MMT-2CH TO SCANIA RADIO PREMIUM

The Scania Radio Premium camera interface allows you to connect two MTB cameras. One rear view shutter camera and one side view camera. The interface allows use of rear view camera with auto shutter MTB93CD. This protects the lens from rain and dirt giving a clear image when needed. It also supports the heater function of the camera, heating both lens glass and camera housing.

It also allows the use of side view camera to avoid accidents in urban environments when making a right hand turn.

Connecting Trigger one cable to reverse signal and Trigger 2 to right turn signal the camera image will appear automatically on your monitor when backing up or making a right hand turn.
