

# MTB-IF-ORL-2CSH ORLACO MONITOR INTERFACE

## IF-ORL-2C(H)

## FEATURES

- Camera interface for MTB rear view and side view to Orlaco monitor
- 2 Camera Inputs & 2 Triggers (CA1 shutter camera compatible)
- 13,5 ~ 36 V

## FUNCTION

### MTB-IF-ORL-2CSH TO ORLACO MONITOR

The Orlaco monitor camera interface allows you to connect two MTB cameras. One rear view shutter camera and one side view camera.

The interface allows use of rear view camera with auto shutter MTB93CD. This protects the lens from rain and dirt giving a clear image when needed. It also supports the heater function of the camera, heating both lens glass and camera housing.

It also allows the use of side view camera to avoid accidents in urban environments when making a right hand turn.

Connecting Trigger one cable to reverse signal and Trigger 2 to right turn signal the camera image will appear automatically on your monitor when backing up or making a right hand turn.
