

MTB Refuse Truck Camera Solution – Front Loader

FEATURES

- In cab 7" quad monitor
- Rear view camera with auto shutter
- Tool camera at the arm
- Side view camera (cyclist camera)
- Hopper camera

FUNCTION

MTB Front Loader Camera Solution

This solution helps one driver/operator perform the job with ease and safety. The in cab monitor automatically displays a perfect image from the camera or cameras configured for the task performed. When reversing the rear view camera image is shown, when emptying a bin into the hopper camera image appears and when turning on right hand turn signal, this image is shown. It's possible to connect up to 4 cameras and configure the system in many different ways.

Product
